

The **4D ROLLER SYSTEM** works similar to a thumb and a series of ankles pressed on your body, this roller system uses both vertical and horizontal movements and adds a deeper rhythm to the massage. With the revolutionary 4D massage, the AURA massage chair gives you a perfectly relaxing massage at home.

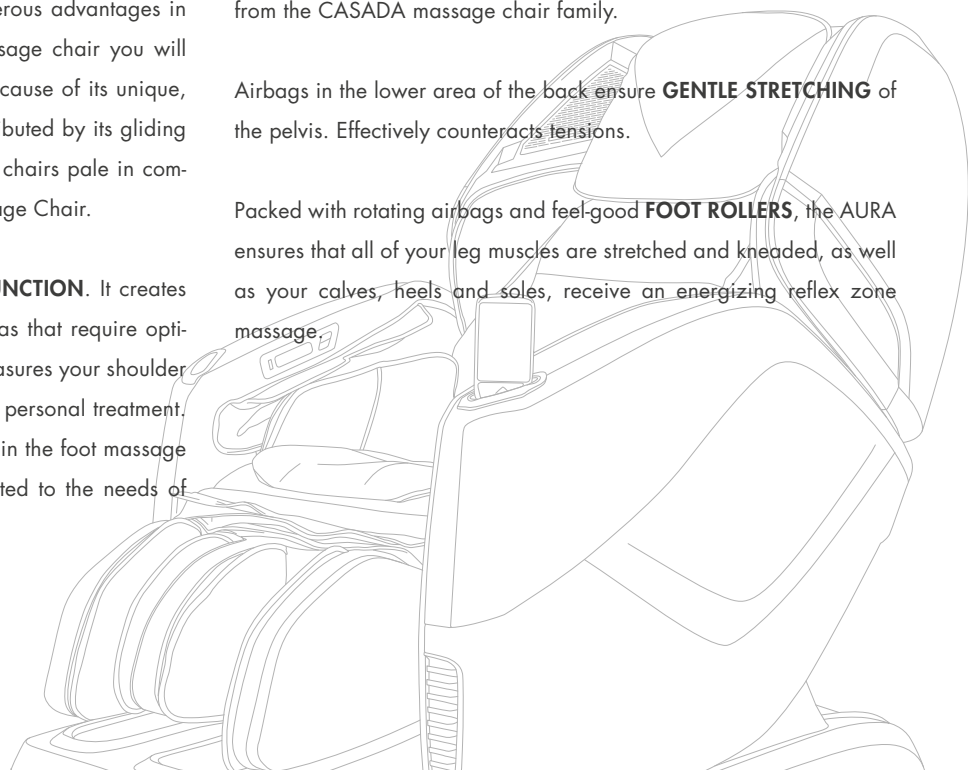

HEATING is a popular technique, due to its numerous advantages in combination with massage. With the AURA massage chair you will experience the feeling of a hot stone massage because of its unique, heated massage heads. With the heat being distributed by its gliding rollers, stationary heating pads in other massage chairs pale in comparison to the heat technology of the AURA Massage Chair.

The AURA massage chair has a **BODY SCAN FUNCTION**. It creates a kind of „map“ of your body to capture the areas that require optimal massage pressure. Moreover, it scans and measures your shoulder height with the possibility to readjust it for a more personal treatment. The same scanning technology can also be found in the foot massage unit, whereby the components can be fully adapted to the needs of your body size.

Adapting to the call of the times, the AURA massage chair has state-of-the-art digital functions and is user-friendly at the same time. Equipped with a slim and easy-to-use LCD remote control, a USB port for charging mobile phones or tablets, **BLUETOOTH-ENABLED HD SPEAKERS** on the headrest and integrated with Braintronics® Technology, the AURA massage chair is definitely one of the luxury complete package from the CASADA massage chair family.

Airbags in the lower area of the back ensure **GENTLE STRETCHING** of the pelvis. Effectively counteracts tensions.

Packed with rotating airbags and feel-good **FOOT ROLLERS**, the AURA ensures that all of your leg muscles are stretched and kneaded, as well as your calves, heels and soles, receive an energizing reflex zone massage.

AURA REVOLUTIONISES YOUR PERSONAL MASSAGE EXPERIENCE!

TECHNICAL DATA

Dimensions upright	155(L)x81(W)x122(H) cm
Dimensions reclining	202(L)x81(W)x102(H) cm
Weight	111 kg
Voltage	AC220-240V 50-60Hz
Nominal power	250 W
Rated runtime	15 minutes
braintronics®	21 minutes
Certificates	CE PCF X CERTIFIED

AVAILABLE COLOURS

Width of seating area 50 cm | Width of shoulder area (inside) 60 cm

SPECIALS

BRAINTRONICS®
Braintronics technology synchronises your brainwaves through audio stimulation. Combined with a specially developed massage programme your stress-ridden body will be able to relax. No matter whether you'd like to relax, dream or learn – anything's possible.

	SHIATSU Shiatsu (finger press) is a form of body therapy originating in Japan. The massage technique consists of soft, rhythmic, far-reaching stretches and rotations. The aim of Shiatsu is to simulate individual parts of the body and to mobilise the muscles.		AIR AREA Whole body airbag massage. Different areas are individually selectable.
	4D MASSAGE The 4D L-Track massage has been improved to provide a wider, deeper and more rhythmic massage than conventional massage rollers. This 4D massage is the most realistic like-from-hand massage in on the market.		SPOT The massage heads can massage a particular spot.
	KNEADING Skin and muscles are either clasped and kneaded between the thumb and the index finger or with both hands. This massage technique is used in particular to ease tension.		SPEED Massage speed is adjustable.
	TAPPING Short, tapping movements are performed with the edge of the hand, the palm or the fist. This promotes blood circulation in the skin and softens tense muscles. If tapping is performed at lung height, this can improve the release of mucus in the lung.		WIDTH The distance between the both massage heads can be set (narrow, medium and wide).
	KNEAD & TAP (DUAL ACTION) The techniques of kneading and tapping are combined in order to relieve tension and stimulate blood circulation at the same time.		MUSIC Further relaxation and fun with the music function.
	ROLLING Pleasant alternation between relaxation and releasing the muscles – also perfectly suited for a final massage, for relaxation and recovery of the muscles.		BLUETOOTH Wireless data transmission.
	HEATING A deep penetrating and heat-radiating effect in which one can perfectly relax. This function is particularly beneficial for muscle tension due to the deep reaching effect.		HUMAN HANDS FEELING Specially designed massage heads imitate the hand motion of a professional masseur. The maximum stretch space is 6,5 cm, and the maximum stretch angle is 41 degrees, so the mechanical hands can do effective massage to human cervical vertebra thoracic vertebra and lumbar vertebra.
	FUSSROLLER Fußmassage kann stimulierend auf die Nervenenden sowie betroffene Organe im Körper wirken. Die Muskulatur wird entspannt und das körperliche Wohlbefinden verstärkt.		USB-CHARGER While you relax, the integrated USB port can supply, for example, your phone with power.
	AIR COMPRESSION Rising and receding airbags have a pumping motion which produces natural muscle reflexes. This is particularly beneficial in the calf and foot area.		QUICK START With one touch the quick start buttons in your armrest allow you to control the most important functions.
	SL-SHAPE Thanks to the „SL“ curve rail technology, which has been approved from human engineering, the range of the massage technology is up to 135cm. This method allows you to enjoy a personal full-body massage from head to thigh and supports the maintenance of the „S“-shaped spine.		ARTHROSE TRACTION Arthrosis Traction consists of gentle stretching pressure. It has a stimulating effect on the cartilages, which enhances the transport of bodily fluids, nutrients absorption and can alleviate symptoms of arthrosis.
	ZERO SPACE For the lying-position the massage chair moves forward and therefore requires very little distance to the wall behind. Space saving and comfortable!		WAIST STRETCH Airbags in the lower area of the back ensure gentle stretching of the pelvis. Effectively counteracts tensions.
	ZERO GRAVITY You put yourself in the position of an astronaut – that “weightless feeling”.		HEATED ROLLERS The massage chair comes with the most innovative comfortable back heating on the market so far. The rollers heat up by themselves and simulate hot stones to warm the muscles. Compared to conventional heating systems, this provides a greater surface area to apply heat from your neck all the way to the back of your thighs.
	AUTOMATIC Specifically developed automatic programmes for the whole body, which offer a big range of different massage techniques. Additionally you can also turn on the heating function, if you'd like.		DUAL SENSOR BODY SCAN The massage chair performs a body scan to capture the main areas of the neck and back to ensure optimal pressure throughout the massage. The scan technology detects the height of your shoulders, that can be modified after the scan, if required.
	BACK AREA An individual applicable to any size massage area.		BLUETOOTH AMPHITHEATRE SOUND SPEAKERS The massage chair is equipped with Bluetooth technology and an amphitheatre sound system that reduces ambient noise and boosts your sound experience. In this way you can enjoy your massage even with your favourite meditation application or your favourite music. We recommend starting the Bluetooth speakers with the lowest volume before playing music and then gradually increasing them to your desired level.
	ADJUSTABLE FOOTREST The footrest can be extended, this way it is adaptable to different body sizes.		SLIM LCD TOUCH SCREEN REMOTE CONTROL Using the touch screen, you can select your desired massage comfortably and adjust all other settings. You can navigate through the menu by clicking the buttons to select Neck/Shoulder, Lower Back, Auto, Manual, Advance or Air Massage. Optionally, you can set the massage time to a period of 5 minutes, starting from 5 minutes up to 30 minutes.
	RECLINING POSITION The adjustability of the backrest and footrest contributes to personal well-being of the body position.		
	ADJUST SHOULDER The massage heads can be moved upward or downward to a suitable position in the shoulder area.		
	AIR INTENSITY Adjustable airbag massage intensity.		

braintronics®

brainwave stimulation system

The human brain is a complex organ consisting of millions of little nerve cells, called neurons. Each cell constantly produces tiny electrical impulses. Every thought, every sound and every impression, everything is transmitted and communicated by those small electrical impulses. Electricity is, so to say, the language of the brain. The sum of those impulses can be detected and diagrammed, e.g. by using an EEG. Charted on a graph this electrical activity forms a wave-like pattern, known as brainwaves.

With braintronics®, combining audio stimulation and guided meditations with a soothing massage, these brainwaves can be stimulated in order to reach different states of relaxation in the brain. Whether you want to sustainably enhance your concentration, or just relax and pamper yourself – everything is possible with a massage chair from the Casada family.
