

HIGHLIGHTS

ROLLING

Pleasant alternation between relaxation and releasing the muscles – also perfectly suited for a final massage, for relaxation and recovery of the muscles.

KNEADING

Skin and muscles are either clasped and kneaded between the thumb and the index finger or with both hands. This massage technique is used in particular to ease tension.

AIR COMPRESSION

Rising and receding airbags have a pumping motion which produces natural muscle reflexes. This is particularly beneficial in the calf and foot area.

CARBON HEATING

Deeply penetrating Carbon infrared heat, blood vessels expand, the blood flow increases and the muscle tone is reduced. In addition, it carries out a highly beneficial effect on nerve cells, which are responsible for reporting pain to the brain.

KNEAD & TAP (DUAL ACTION)

The techniques of kneading and tapping are combined in order to relieve tension and stimulate blood circulation at the same time.

TAPPING

Short, tapping movements are performed with the edge of the hand, the palm or the fist. This promotes blood circulation in the skin and softens tense muscles. If tapping is performed at lung height, this can improve the release of mucus in the lung.

SOLE ROLLER

The foot massage stimulates the nerve endings and certain organs of the body, which also relaxes the muscles.

L-SHAPE

You can expect a profound full body massage from the neck down to the buttocks.

S-SHAPE

With this automatic program the massage heads are working very close to your body, they massage the whole back down to your buttocks. The S-shaped mechanic is constructed after the natural anatomy of the spine.

ZERO SPACE

For the lying-position the massage chair moves forward and therefore requires very little distance to the wall behind. Space saving and comfortable!

ZERO GRAVITY

You put yourself in the position of an astronaut – that “weightless feeling”.

2D MASSAGE

The intelligent 2D massage mechanism allows the massage chair to measure your back to determine a more exact position of the sections of the spine.

AUTOMATIC

Specifically developed automatic programmes for the whole body, which offer a big range of different massage techniques. Additionally you can also turn on the heating function, if you'd like.

BACK AREA

An individual applicable to any size massage area.

ADJUSTABLE FOOTREST

The footrest can be extended, this way it is adaptable to different body sizes.

ADJUSTABLE PILLOW

If necessary, the double cushion can be placed to reduce the neck and shoulder massage intensity.

RECLINE POSITION

The adjustability of the backrest and footrest contributes to personal well-being of the body position.

ADJUST SHOULDER

The massage heads can be moved upward or downward to a suitable position in the shoulder area.

AIR INTENSITY

Adjustable airbag massage intensity.

AIR AREA

Whole body airbag massage. Different areas are individually selectable.

SHIATSU

Shiatsu (finger press) is a form of body therapy originating in Japan. The massage technique consists of soft, rhythmic, far-reaching stretches and rotations. The aim of Shiatsu is to stimulate individual parts of the body and to mobilise the muscles.

SPOT

The massage heads can massage a particular spot.

SPEED

Massage speed is adjustable.

WIDTH

The distance between the both massage heads can be set (narrow, medium and wide).

MUSIC

Further relaxation and fun with the music function.

BLUETOOTH

A wireless connection to your smartphone or tablet ensures a facilitated music experience.

ACUPRESSURE POINTS

Key acupressure points are massaged.

REFLEXOLOGY

Reflexology regenerates foot muscles and has a harmonizing effect on almost all organs inside your body.

HUMAN HANDS FEELING

Specially designed massage heads imitate the hand motion of a professional masseur. The maximum stretch space is 6,5 cm, and the maximum stretch angle is 41 degrees, so the mechanical hands can do effective massage to human cervical vertebra thoracic vertebra and lumbar vertebra.

QUICK START

With one touch the quick start buttons in your armrest allow you to control the most important functions.

USB-CHARGER

While you relax, the integrated USB port can supply, for example, your phone with power.

CARBON LEG HEAT

The deep-acting carbon infrared heat is ideal for those who suffer from circulatory disorders or muscle tension. The heat dilates blood vessels and stimulates blood circulation. At the same time, muscle tone is relaxed, resulting in deep relaxation.

TECHNICAL DATA

Dimension upright	149,6 x 73,5 x 115,3 cm
Dimension recline	175,6 x 73,5 x 84,2 cm
Seating size	44 cm
Shoulder with	50 cm
Weight	78 kg
Voltage	220 - 240 V ~ 50/60 Hz
Nominal power	95 W
Rated runtime	20 minutes
braintronics®	21 minutes
Certificates	CE EAC X

POLLUX

Maximum comfort for your home

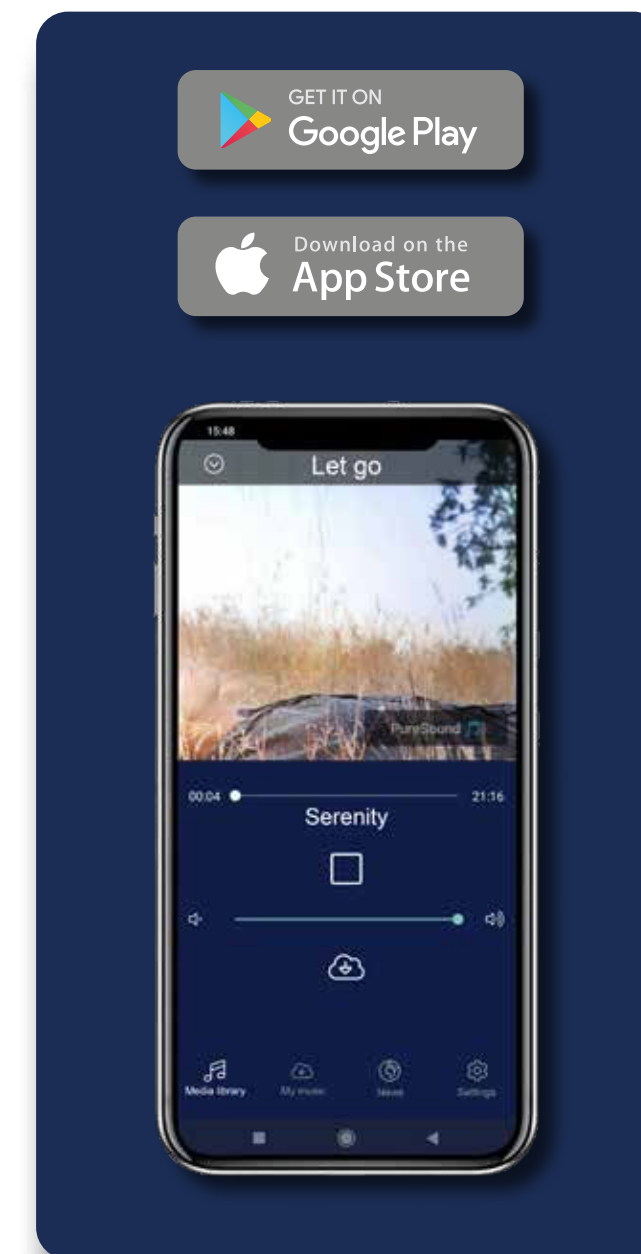

EXPERIENCE THE ULTIMATE RELAXATION WITH THE POLLUX MASSAGE CHAIR - SPACE-SAVING AND COMPACT!

Don't miss the unique massage experience of the Pollux massage chair. Space-saving with a compact design and at the same time offering a huge range of different functions that will synchronise your body and mind. Treat yourself with a choice of 6 automatic massage programs or select different massage techniques for an individual massage according to your needs. Due to its high quality and long-lasting materials, the massage chair proves to be a constant and stylish mate. Benefit from its carbon lumbar heat for counteracting tense muscles.

Enjoy the astronauts' technology and sink into complete relief for your back with the Zero-G function. Feel weightless and gain the unique opportunity to escape from your everyday life. The specially developed massage heads imitate the feeling of a professional hand massage.

How nice would it be to welcome your personal masseur whenever you want to in your cozy home?

BRAINTRONICS®

The human brain is a complex organ made up of countless nerve cells, also called neurons, which constantly produce tiny electrical impulses. Every thought, every sound and every impression is conveyed through these small electrical impulses: it's the language of the brain, so to speak. The sum of all these pulses can be represented graphically in the form of a wave. And this wave is what we call a brainwave.

Using a combination of braintronics® audio stimulation, guided meditation and soothing massage, you can achieve various states of relaxation in the brain by stimulating the brain waves. It doesn't matter whether you want to improve your concentration over the long term, relax or let yourself be pampered - anything is possible with a massage chair from the Casada range.
